DETAILED ACTION

Double Patenting

1. Claims 1-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6318666. Although the conflicting claims are not identical, they are not patentably distinct from each other because the broad recitation of the claims in the instant application directly encompass the slightly more specific claims of the US patent 6318666.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wachspress (US 4874346).

Regarding claim 1, Wachspress teaches a superconducting object in the form of the shape of a sphere that levitates in the earth's geomagnetic field (abstract).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are drawn to superconducting: 5831362, 5430009, 5267091, 5841211, 6193194, and 6318666.
